CAPONORD 1200 Travel Pack: Grips and Storage

HEATED GRIPS - 2S000044

This kit (heated grips plus connecting cables) allows the rider to choose between 3 levels of heat, increasing the comfort and safety during the colder periods. Grips have built in insulation to keep the left grip from heating the bar. Uses the pre-installed power pigtail under windscreen / heat level button and display on dashboard . Available July 2014

Heat Level = OFF	Heat Level = 1	Heat Level = 2	Heat Level = 3

TOP BOX WHITE - CM257201

TOP BOX RED - CM257203

Color matching topbox kit, fits one full face or modular helmet and gloves. Comfortable passenger backrest with material matching the saddle. Keyed quick release.

**TAIL BAG - 2S000050**

Tail bag consisting of a bag that fastens onto a nylon base with side pockets. The bag has shoulder straps for ease of carry. Once the backpack has been removed, the base can remain fixed to the bike without compromising passenger comfort.

**TANK COVER - 2S000054**

Made of nylon and PVC, comes with two vinyl tank protector sheets, gives a mounting point for the tank bag.

**TANK BAG - 2S000053**

Expandable, with large pockets and a carry handle, fastens onto tank cover with quick release clips and an adjustable fastener, includes a rain hood.

SPORTGEL RIDER SEAT - 2S000040

SPORT GEL PASSENGER SEAT - 2S000041

SPORTGEL LOWER RIDER SEAT - 2S000042

For those looking for the best driving comfort, we offer rider and passenger gel seats. The rider seat is available in both a stock height version and a 20mm lower version.

SPORTGEL LOWER RIDER SEAT seat available July 2014.

**BIKE COVER - 2S000055**

Protect the bike totally against dust, scratches and minor knocks, custom made to measure with minute attention to details. Antistatic, elastic material that can work with the windscreen. Quick release topbox must be removed for cover to fit. Sidebag or topbox removal is recommended.

**BRAKE DISC LOCK DEVICE – 898735**

Roadlok has two components, a permanently-mounted bracket that stays on the caliper and a small removable pin. The pin locks into the holes on the OEM rotors, preventing turning. The locked wheel allows the bike to go onto the center stand but prevents it being taken off the center stand. High security key.

***CARBON FRONT FENDER- 895394***

Same high quality dry carbon fiber used on the RSV4 Factory, this direct bolt on replacement saves unsprung weight and gives a high performance look. Comes with all the necessary hardware. Please note that two holes must be drilled to mount the ABS wire and the brake hose.

***CLUTCH PROTECTOTR – 899813***

Made from laser-cut stainless steel, it is supplied with fastener hardware. Also fits Dorsoduro 1200.

LEFT BLACK ANODIZED REARVIEW MIRROR - 890471
RIGHT BLACK ANODIZED REARVIEW MIRROR – 890272

CNC and black anodized aluminum mirrors. Adjustable tension on mirror. Ball and socket design allows almost infinite fine adjustment.

FENDER ELIMINATOR – 895323

With an eye-catching design, this laser-cut steel accessory has an adjustable angle. Reuses the original plate light. Includes mounting for original reflector. For track use only. Fits EU sized plates, lower tabs must be moved for USA plates which mount using only the top mounts.

**ARROW SLIP ON SILENCER- 2S000043**

Titanium slip-on silencer with carbon end-cap. Sporty looks, spine-tingling sound, maximum performance on the road. Euro3 compliant. Does not replace the OEM catalytic converter in the headers. Does not require a remap.

**ELECTRONIC ALARM - 2S000081**

An electronic alarm that can be easily installed on the vehicle through a preinstalled pigtail on main wire harness. The electronic anti-theft alarm system is a compact radio-controlled and latest generation of alarm technology. Among its features: engine block sensor integrated navigation, and a high level of protection.

APRILIA MULTIMEDIA PLATFORM ECU - 2S000088
APRILIA MULTIMEDIA PLATFORM INSTALL KIT - 2S000049

Connected the Caponord 1200 via bluetooth to an iPhone, transforming it into a true and proper on board computer. Customizable in graphics and content, such as rpm, power reserve, fuel use, lean angle, max lean angle, coolant temp, etc.

In order to mount the iPhone the customer will need to buy: 2S000088 ECU + 2S000049 install kit + your choice of smartphone holder. We recommend the RAM RAM-B-367U ball (use the shortest bolt) + RAM-B-201U-A (short arm to place phone at center of bars) + RAM-HOL-UN7BU (x-grip mount for iPhones with cases) or the Evotek 4Lock support.

BIG WIND SCREEN KIT - 2S000065.

This windshield has been designed to offer maximum protection from the elements without losing the focus on design. It has been approved according to the standards TUV and DOT and tested on road in every condition by Aprilia test riders. Available Q3 2014. Pictures available soon.
